EXPERIENCE

Rencata   February 2019 - Present
Software Engineer
• Implemented new features and bug fixes to company mortgage LOS platform
• Refactored code and database functions/stored procedures for better performance and readability
• Modified codebase to support inbound/outbound data from new and existing third-party vendors

Glidewell Laboratories   October 2018 - November 2018
Software Developer Externship
• Developed a sales resource tool to enable a quick overview of products available around the world
• Architected the front-end with React, and constructed all RESTful API routes with Node.js
• Implemented an application management state with Redux for consistent data flow on the front-end

W+R Studios   September 2016 - August 2018
Business Analyst
• Redesigned companies' tracking process resulting in improved and more accurate data metrics
• Collaborated with software development team to help ship out new product features and fixes
• Created dashboards with key metrics (ex: what % of customers leave the funnel) for senior management

SKILLS AND TOOLS

SKILLS: C#, .NET Core(2.x), React, Entity Framework, JavaScript, Node.js, SQL, HTML, CSS
TOOLS: Git, SQL Server, Azure, Postman, GitHub

PROJECTS

StockWatch | Technology Stack: **React, Redux, Bulma, React Router, IEX API**
A clean and easy to read stock dashboard with real US stock market data
• Used Redux to help manage data coming in from IEX (API provider)

Let Us Choose | Technology Stack: **Node.js, React, React Router, GraphQL, Yelp API**
Random restaurant and activity generator for people who are picky
• Implemented GraphQL to help avoid "over fetching" data from Yelp's API

EDUCATION

California State University of Fullerton
Bachelors of Arts, Business Administration
